NSEAC Issues RFP for New Three Year Power Supply Agreement

In December 2011, the Cities of Highland Park, Lake Forest, and Park Ridge, and the Villages of Deerfield, Glencoe, Lake Bluff, Northbrook, and Skokie formed the North Shore Electricity Aggregation Consortium. The Consortium was created to act as a collective body of municipalities to create and manage municipal electric aggregation services on behalf of their residents and eligible businesses. Each Consortium community executed a three-year contract with the same selected alternative electricity supplier to supply power to an estimated 90,000 Consortium customers. Through May 2014, the Consortium has saved its customers more than \$30 million dollars due to lower rates than the current default tariff service rate for its residents and small businesses, while also acquiring a cleaner portfolio of power supply.

Through this RFP, the Consortium is soliciting proposals for various pricing options, and options for increased volumes of renewable energy for a new three-year Power Supply Agreement. The selected Vendor shall assist the municipalities within the Consortium in continuing to provide and enhancing their Aggregation Programs, which include residential and small commercial accounts that meet the definition of "eligible retail customer" that are located within each Consortium member communities' boundaries. The Vendor awarded an Agreement hereunder shall coordinate with the Consortium's electricity consultant, Intelligent Power Partners LLC, in order to deliver services required under a Power Supply Agreement.
